

Paris Session 2022

Sustainability optimized throughout the system life-cycle

Study Committee C3

Preferential Subject 1 Question 1.11

What is the experience among the audience about the development
and use of digital twins for the management of networks?

Andreas Vollmer - Switzerland

HITACHI
Inspire the Next

Sustainability optimized thanks to lifecycle digital applications?

Our solution optimize sustainability by implementing practices that protect people, the environment and economies

01

Monitors system condition to improve system reliability, safety conditions and cost

02

Tailormade services and digitally augmented solutions to eliminate unnecessary activities and their corresponding environmental impact

03

Optimizes the life-cycle, executing the right actions on the right time, prioritizing critical assets securing the higher sustainability performance possible

Group Discussion Meeting
