

## Building Ecosystem with Standards

*SC D2*

PS2 - Q 2.2: What are the future needs of cyber security regulations, standards, protocols, or procedures for the power industry?

Djenana Campara  
Bosnia & Herzegovina / Canada

## Subjectivity in interpreting data ...

- Many current standards in the cybersecurity space are mostly process oriented, informal, relying upon subjective interpretation

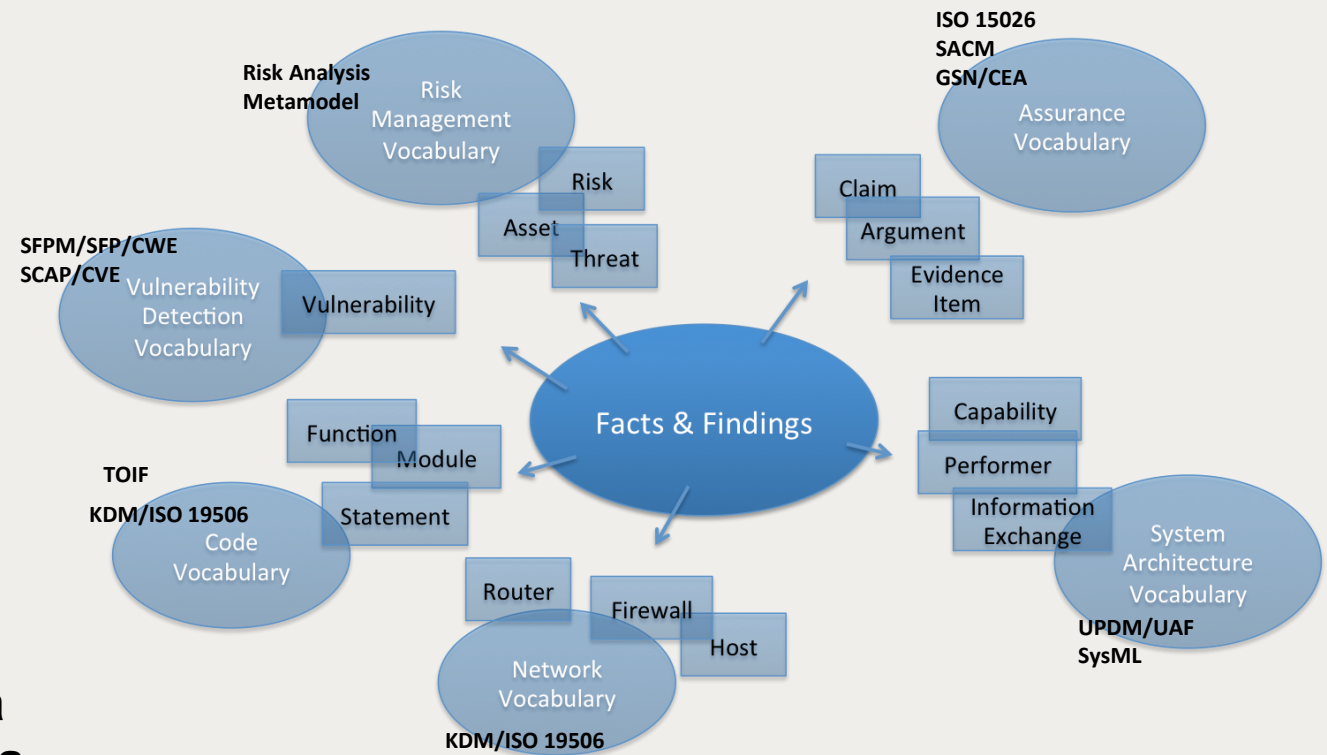

**Current Cybersecurity Assessments to determine Risk are subjective**

Group Discussion Meeting

# Ecosystem of standards for automated producers and consumers

- Value
  - Objectivity
  - Systematic approach
  - Confidence in outcome
  - Automation
  - Cost efficiency

**To exchange data, you need to have a formal rules to build and interpret data**
